OPPOSED TO THE "LEGALIZED ATROCITY." Parents and Children Have Some Rights that Ought to Be Respected.

Editor of The Eventing World; My attention has been called to a circular letter by the President of " The Society for the Prevention of Cruelty to Children," in which he strongly opposes the passage of Assembly Bill No. 45 by which it is sought to so amend the Penal Code that the parents of a child which has been committed to a public institution by the warrants of an inferior magistrate may have the proceeding resulting in such commitment inquired into. both as to the law and the fact by a Judge of a Court of Record.

This is an eminently proper bill, and one which ought to be passed. It is difficult to conceive of any case in which the right of review may be more urgent.

When a child is forcibly taken from the home of a parent and committed to a public institution, the parents and guardians should certainly have the right to an investigation by a judge of a court of record as to the justice and legality of the proceeding.

The Society referred to has done much good work in protecting children whose parents would not or could not properly care for them. The passage of the bill referred to will not in any way hamper the proper exercise of its duties, but it will operate as a salutary restraint upon unwise, hasty or incon siderate victims.

It is certainly to be desired that the very great and arbitrary powers conferred upon the New York Society for the Prevention of Cruelty to Children, which may easily be perverted to injustice and wrong, should be exercised under the supervison of a Judge of a Court of Record.

There should be no arbitrary interference between parent and child. When a child is forcibly taken from a parent under the instigation of this Society, it should be prepared to show that there was a real and pressing necessity for its interference and that it has

not proceeded unjustly or illegally. The judges of our higher courts can devote their time to no more useful business than in seeing to it that parents are not unjustly or arbitrarily despoiled of their children.

Nor would there be danger in demanding our rights, for, if our navy is weak, we have that which will create a navy at short notice—an unlimited amount of money—and all the world, knows it.

United States Military Affairs Watched by the Germans.

Our Points of Strength and Weakness on File at Berlin.

Spies Enlist in Our Army and Navy to Gain Information.

While the tests of the dynamite gun were going on down the bay the other day a small, alert, sharp-eved little man made his appearance and began to watch and listen carefully. The little man was at once recognized by Lieut Zalinski and others as Baron von Stomberg, who is an officer of the Imperial Ger-

mau Army. The Baron had not been invited to the test Indeed, his presence was not altogether desirable, yet he was received with courtesy and shown attentions fitting to his rank.

This is only another instance following many which have been disclosed within the last five years, indicating the thoroughness of the German War Department's espionage over the army and navy movements and the defensive arrangements of the United States. The same espionage, it is said, has been ex-

ended over other powers, but not in all cases to such an extent as in this country.

German officers have enlisted as privates in our army and as common satiors in our navy, and after getting what information they needed, have calmly deserted and returned

to their rank and station.

These spies are detailed from the German forces and are chosen with great care from among the brightest officers. They, upon receiving their assignments, sink their identity and assume whatever disgnise may be necessary, even to that of a wandering

peddler. Everything about our country, its defenses, its resources, its railway facilities, its points of strength, its weaknesses—all the informa-tion that could be of any possible service to an attacking or invaling enemy, is believed to be on file, in maps and papers, in the German War Department.

The control of this matter of keeping in-

formed as to the state of the affairs of other countries is vested in a general staff, by the head officer of which all operations are ordered and directed. Other nations, particularly Great Britain,

have a somewhat similar system, but nothing approaching the completeness of the German

approaching the completeness of the German arrangement.

The utility of the German method was amply demonstrated in the latest Franco-Frussian war, when the Germans actually knew mere of the country they invaded than did the defenders of that coun rv.

It might be proved again in case the Samoan complications should lead to a strife between Germanv and the United States, and it is because of the possibilities involved in this matter that especial interest centres about the accomplications of the German spies who are and have been among us.

If the United States has had any similar espionage over the affairs of Bismarck's realm the secret has been carefully guarded.

I hear each day young women say
They'd much prefer this man or that man;
Now, as for me,
My choice would be
'Most any man except a fat man.

Which is to say, I humbly pray
That when it comes my turn to win one,
I'll wed no lout
That's coarse and stout,
But one that's lean—that is, a thin one.

His eyes of hue should be the blue
Which folk ascribe unto the gander's;
Legs slightly bowed
And pigeon-toed,
As round the village he meanders.

About his mouth should be no growth Of tawny whiskers, long or short, six Of tawny whiskers, long or short, sir;
But on one cheek,
Smooth-shaved and sleek,
I'd have him have, a mole or wart, sir;

I hate the shocks of perfumed locks
Which many a silly dandy showeth—
They don't compare
With the sparse blonde hair
Through which the wind of Winter bloweth

I'd have my bean six feet or so.

His contour should be lithe 'nd lissome—
It's nice to stand On tiptoe and Embrace the fellows when you kiss 'em!

He might not be a treat to see,
But he'd be dutiful and tender—
And ne'er be found
A-sailing round
A-courtin' other female genc'er,

At home his glance would be a lance Sendin' delightful shivers thro' me-Or, if away,
He'd write each day

FIRE, PANIC AND A CRASH. AT THE SPIGOTS OF WIT.

CRUSH TWO HOUSES.

There Is a Seventy-Five-Thousand-Dellar

Loss for the Proprietors of the Factory and There Were a Big Scare and Narrow Families Frightened Out Into the Cold.

A disastrous fire occurred at the sash and blind factory of C. Graham & Son's Company, 305, 307 and 309 East Forty-third street, early this morning.

The building is surrounded by a number of large tenement-houses, the occupants of which were frightened almost out of their wits by the fierce conflagration, and the police had all they could do to prevent a serious panic.

The fire was discovered at 1 o'clock by Po liceman Reagan, in the fourth story of the factory. That floor was used as the cabinet shop, while the varnish rooms were just above on the top floor. By the time the firemen had arrived the

upper floors were completely enveloped in flames, which had spread quickly through the combustible material of the factory. The blaze drove back the firemen, who

tried to run a line of hose up the narrow stairway at No. 305, and it seemed impossible to get at the fire. Three alarms were sent out and a special call for the water tower.

and a special call for the water tower.

Meanwhile the flames were pouring from all the windows in the upper part of the building, and the big double tenements in Second avenue and in Forty-fourth street was threatened. The people fled from both buildings in droves, and carrying what they could with them. People living in Forty-third street were also

People living in Forty-third street were also greatly alarmed, and the window sashes and blinds smoked in the intense heat.

The fire had been going for half an hour when it was noticed that the walls on the west end were beginning to bulge over the two little two-story buildings at 301 and 303 East Forty-third street. The first one was occupied by W. Flynn and his wife, and the latter by Mrs. Kelly, a widow, her two daughters—Mrs. Siegel and Mrs. Skeily—and two boarders. Patrick Meanan and Thomas

Mrs. Kelly fainted and had to be carried into a neighboring house.

## MISS WAINWRIGHT AS LADY TEAZLE.

Miss Marie Wainwright's conception of the rôle of Lady Teazle, in Sheridan's "School for Scandal," presented at the Grand Opera-House, last night, differs somewhat from the conventional idea. Miss Wainwright is an ardent believer in the facinating qualities of the soubrette. Her Rosalind was pert and soubrettish, at times. Her Lady Teazle is a "cute little woman of the world, whose quarrelsome propensities are not at all alarming, and who could not possibly have rendered Sir Peter Teazle's life as miserable as Sheridan wanted to show that her ladyship did. Miss Wainwright. wheedles, and coquets, and bridles and pouts. She renders the rôle of Sir Peter ri-diculous, for no man, unless he were an idiot (and Sheridan has no intention of making Sir Peter idiotic), could find it in his heart to snub

her piquant ladvship. That Lady Teazle in Miss Wainwright's hands is a delight to the eye and ear, is a fact not to be disputed. Miss Wainwright is utterly charming. She has a dainty personality that is magnetically appealing. Miss Wainwright has one or two of Miss Ada Rehan's characteristics, and any woman who has one or two of those-or even half of one must be interesting.

When Miss Wainwright has overcome fortunate self-consciousness, and has learned that no man or woman on the stage can afford to remember the audience, she can be looked upon as one of the most promising "stars" of the day. Miss Wainwright carefully watches the effect of every point upon the audience. The supreme charm of Miss Ada Rehan's acting is that she sees no one beyond the stage, and is apparently oblivious of the fact that there is any other world than the fictitious one in which she is moving.

Louis James was rather a colorless Charles The members of the company were not thoroughly at home in their parts, but remembering that the play was not put on for a run they did fairly well. H. A. Langdon was Sir Peter Teazle; F. C. Mosley, Joseph Surface; E. G. Prof. Poe has invented an artificial pair of lungs, which he uses to restore life for

drowning or asphyxiating.

Socrates has been submerged under water in the presence of a number of witnesses and held there for ten minutes, and Socrates has also been done to death with fumes of burning charcoal, until all signs of life have been extinct. A mirror held at the mouth and nose showed no vapor, neither was there any heart action.

Prof. Poe attached his patent bellows covering over the mouth and forced oxygen into

ering over the mouth and forced origen into the lungs. The returning suction of the pumps drew out the deadly gases, and thus an artificial respiration produced a muscular expansion and contraction of the lungs of the subject until life was restored.

Prof. Poe claims that he can drown and restore human beings as well as rabbits. He will not divulge the secret of compounding

or the quantities of gases used.

He thinks his artificial lungs will become generally adopted by fire departments and hospitals through the country. Socrates is quite well to-day, jumping about the door-yard, but this evening he is to be drowned again.
